To prevent malfunctions caused by the weak batteries, charge the memory protection batteries for over 12-hours before installation or after a long-time vacation (over 30 days).

- Before installation, initialize the terminal and leave it turn on over 12-hours.
- After a long-time vacation, initialize the terminal and restore the program data if the terminal is in malfunction, and leave it turn on over 12-hours.
- Over 48-hours charging makes the batteries fully charged.

| Roll paper | P-5880T | | Common |

CAUTION RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

2. MACHINE INTIALIZATION

7. Press <SUBTOTAL> to register the program code.

Worksheet (Initialize)

| Description | Choice | Program code | |
|--|--------|------------------------|--|
| Print password of PGM mode, when flag clear operation is performed. | | Yes = 0 | |
| Password in PGM3 ~ 7 mode | | Significant | D_{11} D_{10} D_{9} D_{8} D_{7} |
| Messages and descriptors are written in English = 0, French = 1, Spanish = 2, German = 4 | | Significant number | |
| Model forU.S. or Canada (Date order: month/day/year)= 2,Other area (1, 11, 11, 12, 12, 12, 12, 12, 12, 12, 1 | | Significant number | D ₅ |
| Fixed value: TE-2200: 25 TE-2400: 04 | | Significant numbers | $ \begin{array}{c} \Box \\ D_4 \end{array} D_3 $ |
| Use clerk switch (clerk push switch)/ Clerk secret number key * | a | (1) = 0 (2) = 1 | (a+b) |
| Initialization pattern: ① For scanning/② For check tracking | b | (1) = 0 (2) = 2 | D ₂ |
| Use Euro only. | | No = 0 Yes = 1 | D ₁ |

* When you select this option "Use clerk secret code key", and your register doesn't have this key on the default keyboard, be sure to allocate <CLERK-#> (clerk secret number key) just after the initialization. (Do NOT turn to OFF before allocating this key.)

Note:

Please check the receipt after initialization operation (machine initialization, flag clear operation and init2) that the machine number is printed properly.

If error codes are printed on it, check the hardware and retry the operation.

| P01 0 C01 | 3-04-2004 11:58 MC#01 (| - 000001 - | Mode symbol/date/time Clerk descriptor/Mc-No./consecutive No. |

Flag clear operation

5. Press <SUBTOTAL> to complete.

After completion of flag clear, receipt is issued.

Note: After flag clear, clerk 1 is assigned automatically. So do not program clerk 1 as not assignable or not operable in PGM mode.

After completion, receipt is issued.

3. DISASSEMBLY

■ UPPER COVER

1. Remove the printer cover.

2. Remove two screws.

- 3. Remove the printer cover.
- 4. Remove two FPCs.

5. Remove the screw.

6. Remove the upper case by sliding it forward.

7. Remove two connectors. (CN13, CN15)

■ KEY BOARD ASS'Y

- 9. TE-2200: Remove 10 screws.
- TE-2400: Remove eight screws.
- 10. Remove the FPC.

- 11. Remove the chassis.
- 12. Remove the FPC sheet.
- 13. Remove the spacer.
- 14. Remove the sheet.

- 15. Remove eight screws.
- 16. Remove the KEY frame.

■ TACT SW PCB, MODE KEY

- 17. Remove three screws.
- 18. Remove the TACT SW PCB (E443-E6 PCB).

- 19. Remove the screw.
- 20. Remove the MODE KEY.

■ BACKUP BATTERY

- 21. Remove the connector.
- 22. Remove the backup battery.

■ MIAN PCB

23. Remove four connectors.

24. Remove three FPCs.

NOTE; While fixing, be fully care to the direction of the FPC.

25. Remove eight screws.

LCD ASS'Y

26. Remove five screws and then the LCD ASS'Y.

27. Remove three screws and one connector.

■ PRINTER

28. Remove two E272-PR PCBs.

29. Remove four FPCs.

- 30. Remove four screws.
- 31. Remove two printer units.

- 32. Remove the battery cover.
- 33. Remove four screws.
- 34. Remove the lower case.

■ DRAWER

35. Remove the case.

36. Remove 10 screws.

37. Remove the DARWER cable.

38. Remove the Bottom plate.

39. Loosen 4 screws.

40. Remove the screw and then fix the drawer case.

■ POWER SUPPLY

28. Remove the two screws.

29. Remove the POWER UPPER CASE.

- 30. Remove three screws.
- 31. Remove the POWER UNIT.

4. CIRCUIT EXPLANATION

4-1. HARDWARE DIAGRAM

Note: Shadowed device and dot line indicate option devices.

4-2. BLOCK DIAGRAM

4-3. RESET CIRCUIT

The reset circuit is as follows.

4-4. POWER SUPPLY CIRCUIT

The power supply circuit is as follows.

4-5. DRAWER I/F CIRCUIT

The drawer open circuit is as follows.

4-6. PRINTER CONTROL CIRCUIT

The printer control circuit is as follows.

5. DIAGNOSTIC OPERATION

5-1. To start the diagnostic program

To enter the diagnostic program, press "99990000<ST>" right after reset-and-start, IPL boot or INT operation. In QA DIAG (factory module also) module, the mode transfers to the diagnostic mode after INT operation.

* Reset-and-start

① Press the reset switch while pressing JFEED button.

- ② When "INT" appears in the first line of the LCD dot line, press<SUBTOTAL>.
- ③ When "INT" appears in the second line of the LCD dot line, press"99990000<SUBTOTAL>".
- ④ Enter the diagnostic mode.

* INT operation

- (1) While holding down the JFEED button, align the mode key with "PGM" using the OW key.
- 2 When "INT" appears in the second line of the LCD dot line, press "99990000<SUBTOTAL>".
- ③ Enter the diagnostic mode.
- * In the case if "MASK DIAG" is displayed and the counter is activated A false operation has led to the MASK diagnostic mode. Perform IPL operation again.

5-2. Displaying and printing the version

The version of DIAG and MADK ROM/IOC are printed immediately after entering the DIAG mode. However, DIAG/IOC version printing function is available only in QA DIA module.

• All test results are printed by the built-in printer receipt.

```
loc Ver: 4233 AANZAC
Mask Ver: 4207 AAOAAA
Diag Ver:
May 25 2005 09:54 ← DIAG
```

5-3. Notes for the DIAG

- All test result are printed by the built-in receipt printer.
- Make sure to test HHS-15 by connecting to COM2.
- To perform the continuous check, follow the direction for each test, and input numbers except 0. Input numbers 1-9 as the command how many times to perform the test for the operation in each page to perform continuous check. Note that you can only choose one time check or continuous check.
- When turn off by rotating the key, the display is unlit, and DAIG command is not accepted.

[Others]

• ESC value is printed as follows if the test ended by force. Press the "C" key or turn off the power to end the test while performing continuous check. The result of ending by force is not printed in each test.

| ESC

5-4. Displaying the status of the device

[Function]

The status of the device which has the status information is displayed by 7 segments (Pop-up display) as well as lit transaction.

The status information and the displayed position are as follows. As for tact switch, the pressed LED will be lit.

[DISPLAY]

| — Mode display 1:PGM, 2:RF, 3:REG1, 4 | 4:REG2, 5:X 6:Z, 7:XZ2, 8:OFF | |

5-6. Operation of each test

[1] Batch test 1

[Function]

RAM test, test print, time setting, buzzer test and drawer open test are performed continuously.

[Operation]

Operation : 1 SUBTOTAL

The following tests are performed automatically.

- (1) RAM test: WRITE/READ area test.
- (2) Test print
- (3) Time setting: Set the following data. Arranged data: 2005 December 31,23:59'30
- (4) Buzzer: Ring once the one shot buzzer. No print or display in this test.
- (5) Drawer open: Drawer 1 opens only.
- (6) Receipt issuance

[Pop-up display]

 $n = 0 \rightarrow 1 \rightarrow 2 \rightarrow 3 \rightarrow 2 \rightarrow 3$

[Main display]

See "RAM test" if "ERROR" appears while performing the RAM test.

[2] Batch test 2

[Function]

Display test and backlight test are performed continuously.

[Operation]

Operation : 2 SUBTOTAL

The following tests are performed automatically.

- Display test: Refer to "[12] Display test." Press any key to go to the next test.(Same in the backlight test also) Press any key to go on to the next test. (Same in the backlight test also)
- (2) Main test: Refer to "[15] LCD test."
- (3) Pop-up display test: Perform Pop-up display test. See "[14]" for more information.
- (4) Backlight test: Refer to "[13]" for more information.Perform the backlight test.

The backlight color changes if any key is depressed.

Refer to the "Backlight test" for details.

(5) Receipt issuance

[Pop-up display]

Refer to each item.

[Main display]

Refer to each item.

[Print] * Normal print

| 2 | |
|----|--------------------------|
| OK | |
| OK | |
| OK | |
| OK | |
| 2 | |
| | 2 OK OK OK 2 |

[3] RAM WRITE/READ test

[Function]

This test will check the WRITE/READ test for RAM.

A counter is displayed for the RAM test.

Write and read test is performed in the sequence as following. Write common (system area) and read \rightarrow write common(other than the system area) and read \rightarrow write each bank \rightarrow read each bank. Also, the test is not performed for the range to (-400H) by the handler.

[Operation]

n : 0 = One time check (can be omitted)

not 0 = Continuous check (To stop the test, press "C" key)

[Pop-up display]

A counter is displayed for Pop-up display.

$$\boxed{n} \\ n=0 \rightarrow 1 \rightarrow 2 \rightarrow 3 \rightarrow 2 \rightarrow 3$$

[Main display]

| DIAG | 0011 |
|-------|------|
| 0 0 n | |

 $n{=}0 \rightarrow 1 \rightarrow 2 \rightarrow 3 {\rightarrow} 2 \rightarrow 3$

[Print]

The result of all area for RAM test is printed as follows.

| R A M R A M E N D | WR | 1 1 O K 1 1 |
|-------------------------|----|-------------------|
| | | |

* The result is printed as follows if the test ended with an error. If an error occurs while checking the BANKO address 0x60400 for normal RAM

STD RAM WR NG BANK0-60400

* The result is printed as follows if the test ended with an error.

| Print | NG | |

[30] OBR test

[Function]

This is a scanner test. The test enters the wait mode for the scanner input, and waits only for scanner. The test determines the result between OK and NG by comparing the fixed data and the read data. Make sure to connect OBR (HHS-15 or HHS-17) to COM 2.

* The fixed barcode is as follows.

[Operation]

| Operation : | 9 | 5 | SUBTOTAL |
|-------------|---|---|----------|
| | | | |

To stop the test, press "C" key or turn off the power by rotating the key.

[Print]

| OBR 95 OBR OK OBR ERR ******** ESC Prints if the test ended with an error. | OBR OBR OBR ERR ESC END | 95 OK ******* 95 | Normal printing Prints if the test ended with an error. |
|--|-------------------------------------|----------------------------------|--|
|--|-------------------------------------|----------------------------------|--|

[31] Displaying the battery voltage

[Function]

```
Display the battery voltage. Display with three digits.
Example : "300" indicates "3.00" v.
```

[Operation]

| Operation : | 9 | 6 S | UBTOTAL |
|-------------|---|-----|---------|
|-------------|---|-----|---------|

Press "C" key or turn off the power to stop the test.

[Pop-up display]

X X X

xxx : battery voltage

[Main display]

xxx : battery voltage

[Print]

No printing in this test.

6. ERROR CODE LIST

| Error code | Message | Meaning | Action |
|---------------|-------------------------------------|---|---|
| E001 | Wrong mode | Mode switch position changed before finalization. | Return the mode switch to its original setting and finalize the operation. |
| E003 | Wrong operator | Clerk button pressed before finalization of a registration being performed under another clerk button. The signed on clerk differs from the clerk performed the tracking check registration | Press the original clerk button and finalize the transaction before pressing another clerk button. Input correct check number or assign the proper clerk number. |
| E004 | Error INIT/FC | Initialization or unit lock clear operation in progress. | Complete operation. |
| E005 | Insufficient memory | Memory allocation exceeds total memory capacity. | Reallocate memory or expand memory (if possible). |
| E008 | Please sign on | Registration without entering a clerk number. | Enter a clerk number. |
| E009 | Enter password | Operation without entering the password. | Enter password. |
| E010 | Close the drawer | The drawer is left open longer than the program time (drawer open alarm). | Close the drawer. |
| E011 | Close the drawer | Attempt to register while the cash drawer is open. | Shut the cash drawer. |
| E016 | Change back to REG mode | Two consecutive transactions attempted in the refund mode. | Switch to another mode and then back to the RF mode for the next transaction. |
| E017 | Enter CHK/TBL number | Attempt made to register an item without inputting a check number. | Input a check number. |
| E018 | Enter Table number | Attempt made to register an item without inputting a table number. | Input a table number. |
| E019 | Enter number of customers | Finalize operation attempted without entering the number of customer. | Enter the number of customer. |
| E021 | No DEPT Link | No department linked PLU is registered. | Correct the program. |
| E023 | Stock shortage | Actual stock quantity becomes less than the minimum stock quantity. | Perform stock maintenance. |
| E024 | No stock | Actual stock quantity becomes/is negative. | Perform stock maintenance. |
| E026 | Enter condiment/ preparation PLU | No condiment/preparation PLU is registered. | Register condiment/preparation PLU. |
| E029 | In the tender operation | Item registration is prohibited, while partial tender. | Finalize the transaction. |
| E030 | Press RATE TAX key | Finalization of a transaction attempted without registering rate-tax. | Register <rate tax="">.</rate> |
| E031 | Press ST key | Finalization of a transaction attempted without confirming the subtotal. | Press <subtotal>.</subtotal> |
| E032 | Press FSST key | Finalization of a transaction attempted without confirming of the food stamp subtotal. | Press <fs st="">.</fs> |
| E033 | Enter tendered amount | Finalize operation attempted without entering amount tender. | Enter the amount tendered. |
| E035 | Change amount exceeds limit | Change amount exceeds preset limit. | Input amount tendered again. |
| E036 | Remove money from the drawer | Contents of the drawer exceed programmed limit. | Perform pick up operation. |
| E037 | Digit or amount limitation over | High amount lock out/low digit lock out error | Enter correct amount. |
| E038 | Perform money declaration | Read/reset operation without declaring cash in drawer. This error appears only when this function is activated | Perform money declaration. |
| E040 | Issue guest receipt | Attempt to register a new transaction without issuing a quest receipt. | Issue a guest receipt. |
| E041 | Print validation | Attempt to register a new transaction without validation. | Perform validation operation. |
| E042 | Insert VLD paper and retry | Validation paper (slip printer) has run out. | Insert new validation paper. |

| Error code | e Message Meaning | | Action |
|---------------|--------------------------------|--|---|
| E044 | Print Cheque | Attempt to register a new transaction without printing check. | Perform check print. |
| E045 | Print Check | Attempt to register a new transaction without | Perform check endorsement. |
| | Endorsement | printing check endorsement. | |
| E046 | REG buffer full | Registration buffer full. | Finalize the transaction. |
| E047 | Print bill | Separate check buffer full. | Allocate sufficient separate check buffer. |
| E048 | Insert slip paper | Attempt to register a new transaction without | Perform slip printing operation. |
| | and retry | No paper is inserted or paper is out in the slip printer. | insert slip paper |
| E049 | CHECK memory full | Check tracking index memory full. | Finalize and close the check number currently used. |
| E050 | DETAIL memory full | Check tracking detail memory full. | Finalize and close the check number currently used. |
| E051 | CHK/TBL No. is | Attempt to made use <new check=""> to open a</new> | Finalize and close the check that is currently |
| | occupied | new check using a number that is already used | under the number that you want to use or use a |
| | | for an existing check in check tracking memory. | different check number. |
| E052 | CHK/TBL No. is busy | Attempt to use the same check number whilst the specified number is being used in the other terminal. | Use another check number or close the check at that terminal. |
| E053 | CHK/TBL No. is not | Attempt made to use < Old Check> reopen a new | Use the correct check number (if you want to |
| | opened | check using a number that is not used for an | reopen a check that already exists in check |
| | | existing check in check tracking memory. | tracking memory) or use <new check=""> to open a new check.</new> |
| E054 | Out of CHK/TBL No. range | Check number range over. | Enter correct number. |
| E055 | In the SEP CHK | Normal registration is prohibited during separate | Terminate separate check operation. |
| | operation | check operation. | |
| E056 | CHK range full | All check number are occupied in range. | Recall the stored data. |
| E059 | | Attempt to infalize a transaction without specifying $< E\Delta T_{I}N_{2}$ or $< T\Delta KE_{1}OUT_{2}$ | Press <eat-in> or <take-out>.</take-out></eat-in> |
| F060 | Printer offline | External printer offline | |
| E061 | Printer error | External printer went down. | |
| E062 | Printer paper end | External printer paper end | Replace new paper. |
| E064 | Print buffer full | Printing buffer full | |
| E066 | Print from the | Attempt to print the last separated transaction on | Print from the beginning of the transaction |
| | beginning of | slip. | |
| | the transaction | | |
| E075 | Negative balance | Attempt to finalize a transaction when balance is | Register item(s) until the balance becomes |
| 5005 | cannot be finalized | less than or equal to zero. | positive amount. |
| E085 | Data exist in | Data exists in the consolidation file. | Clear the data. |
| E100 | Consolidation file | Prohibit master exerction | Porform it at master terminal |
| | operate at the | | Penorm it at master terminal. |
| F101 | PLU maintenance | Scanning PLU direct maintenance/batch | Terminate the maintenance |
| | file full. Press <#2> | maintenance file becomes full. | |
| | to exit | | |
| E103 | PLU Code is not | PLU code is not existed in the file. | Enter proper PLU code. |
| | exist. Input the PLU | | |
| | Code | | |
| E105 | PLU file full | Scanning PLU/not found PLU file full | Modify the designated item. |
| E106 | Item exists in the PLU FILE | The designated item has already existed in the scanning PLU file. | |
| E112 | Close the journal | The journal platen arm is opened. | Close the journal platen arm. |
| | platen ann | | |

| Error code | Message | Meaning | Action |
|---------------|-----------------------|--|---|
| E114 | Close the receipt | The receipt platen arm is opened. | Close the receipt platen arm. |
| | platen arm | | |
| E139 | Negative balance is | Attempt to register <-> or <cpn> when the</cpn> | Enter proper minus/coupon amount. |
| | not allowed | balance becomes negative. | |
| E146 | Arrangement file full | Arrangement file is full. | Set the arrangement properly. |
| E164 | Employee No. is not | Attempt to enter a wrong employee number | Enter proper employee number. |
| | Found in the | which is not set to the employee file. | |
| | Employee File | | |
| E165 | Employee No. is not | Attempt to clock out the employee who is not | Enter proper employee number. |
| | Clocking-in. | clocked in. | |
| E166 | Employee No. is | Attempt to clock in the employee who has clocked | Enter proper employee number. |
| | Occupied | in already. | |
| E176 | Time&Attendance | Time and attendance file becomes full. | Delete unused employee number or reallocate |
| | file full | | the time and attendance file. |
| E200 | Insert CF card | No CF card is set. | Set CF card. |
| E201 | Illegal Format | Illegally formatted CF card | Format the CF card. |
| E202 | File not found | The designated file is not found in the CF card. | Enter proper file name. |
| E203 | Insufficient memory | Insufficient memory in the CF card. | Use a vacant (formatted) CF card. |
| E205 | File already exist. | Can not write, because designated file has already | Check the operation and retry. |
| | | been Insert new slip paper. | |

NOTES :

- 1. Price and specifications are subject to change withput prior notice.
- 2. As for spare parts order and supply, refer to the "GUIDEBOOK for Spare Parts Supply", published separately.
- 3. The numbers in item column corespond to the same numbers in drawing.
- 4. CASIO does not supply the spare parts without parts code.
- 5. Remarks
 - Q'ty : Quantity used per unit
 - RANK: A = Essential
 - B = Stock recommended
 - C = Less recommended
 - X = No stock recommended
