1 GENERAL DESCRIPTION

This document establishes the requirements for the display device for the Q41/Q41a project. Normally-White, Transmissive, Twisted-Nematic TFT-LCDs Display Type: With Wide-Viewing Optical Films Manufacturer: LG.Philips LCD Mfg. P/N: LP171W01-A4K3 Display Active Area: 367.20 mm (H) x 229.50 mm (V), 17.05" (43.30 cm) diagonal Resolution: 1440 (RGB stripe, H) x 900 (V) 16:10 Aspect: Module Outline Size: 382.2 mm (W) x 244.5 mm (H) x 6.2 mm (D), typical 6.5 mm (D, max) and 6.2 mm (max) at the cable pass-through Weight: 760 g (max), 740 g (typical) Luminance: 160 nits @ 6.0 mA (typical) Power Consumption: 6.5 W @ Black (typical, the logic plus the backlight, 6 mA lamp current, logic 1.7 W and B/L 4.8 W) Color Depth: 6 bits/color, 262,144 colors Surface Treatment: 3H hard coating, anti-glare treatment of the front polarizer

3 PHYSICAL DESCRIPTION

3.1 Display Mode

Normally White, Transmissive, Twisted Nematic Liquid Crystal Displays With

Wide Viewing Films

3.2 Pixel Configuration

RGB Vertical Stripe

3.3 Pixel Pitch

0.255 mm x 0.255 mm, 99.6 ppi

3.4 Resolution

1440 (RGB stripe, H) x 900 (V)

3.5 Aperture Ratio

Minimum > 55%

3.6 Optimum Viewing Cone

6 o'clock direction

3.7 Interface & Driving Scheme

3.3V dual-channel LVDS (Flat Link) interface, DE (Data Enable) only mode, dot inversion (2 sub-pixels)

3.8 Front Surface Treatment

The display surface must meet 3H based on JIS Pencil Scratch Tester for Coated Film (JIS K 5400) and must have anti-glare treatment approved by Apple.

4 MECHANICAL REQUIREMENTS

4.1 Dimensions and Tolerances

Refer to Apple MCO 062-9331, which include height, width, and thickness, mounting details, bulb location, cable length, and connectors. The LCD module outline is described in the following table.

Dimension	Min	Тур	Max	Unit
Horizontal (H)	381.7	382.2	382.7	mm
Vertical (V)	244.0	244.5	245.0	mm
Depth (D)	-	6.2	6.5	mm

Note: 6.2 mm (max) at the LVDS cable path-through.

4.2 Weight

760 g (max), 740 g (typical)

4.3 Exposed Areas and Restrictions

The display module shall not have exposed edges or components, which may cause injury or damage during handling, inspection, assembly, and service. Exposed areas of the display module (those not protected or shielded by construction) must be insulated and otherwise protected to eliminate the possibility of electrical shorting or destructive ESD discharges (per Section 7.2) during handling, inspection, assembly, and service. The Supplier shall identify all such areas prior to the Design Review and work with Apple Engineering to ensure the above criteria have been addressed.

5.2 Display Subsystem (PCB & TFT Panel)

5.2.1 Pin-Out (Dual Channel LVDS Interface)

Connector: JAE FI-XB30SR-HF11 (1.5 mm thickness, normal type, pin 1 starts from left on the front)

Matching Connector: JAE FI-X30M or equivalent (microcoax type)

Interface Chips: Thine KZ4E064H21CFP (integrated LVDS and timing controller)

Pin	Symbol	Description	Micro-coax cable gauge
			(AWG)
1	GND	Ground	40
2	Vcc	Power Supply (+3.3V)	32
3	Vcc	Power Supply (+3.3V)	32
4	V _{EDID}	DDC 3.3V Power	40
5	NC	No Connection	40
6	Clk _{EDID}	DDC Clock	40
7	DATA _{EDID}	DDC Data	40
8	Odd_Rin0-	Odd Channel Differential Data Input	40
9	Odd_Rin0+	Odd Channel Differential Data Input	40
10	GND	Ground	40
11	Odd_Rin1-	Odd Channel Differential Data Input	40
12	Odd Rin1+	Odd Channel Differential Data Input	40
13	GND	Ground	40
14	Odd_Rin2-	Odd Channel Differential Data Input	40
15	Odd Rin2+	Odd Channel Differential Data Input	40
16	GND	Ground	40
17	Odd_Clkin-	Odd Channel Differential Clock Input	40
18	Odd_Clkin+	Odd Channel Differential Clock Input	40
19	GND	Ground	40
20	Even_Rin0-	Even Channel Differential Data Input	40
21	Even_Rin0+	Even Channel Differential Data Input	40
22	GND	Ground	40
23	Even Rin1-	Even Channel Differential Data Input	40
24	Even_Rin1+	Even Channel Differential Data Input	40
25	GND	Ground	40
26	Even Rin2-	Even Channel Differential Data Input	40
27	Even Rin2+	Even Channel Differential Data Input	40
28	GND	Ground	40
29	Even_Clkin-	Even Channel Differential Clock Input	40
30	Even Clkin+	Even Channel Differential Clock Input	40

NOTE: (1) The 28 40-AWG LVDS signal lines shall have an impedance of 50 Ohms per line;

(2) Make sure that the odd channel = lower channel and the even channel = upper channel.

5.2.5 Electrical Ratings

			VALUES			
PARAMETER	SYMBOL	Min.	Тур.	Max.	UNIT	NOTES
Power Supply Input Voltage	V _{CC}	3.0	3.3	3.6	V (DC)	
Power Supply Ripple			50	100	mV _{p-p}	1
Power Supply Input Current	I _{CC}	-	540	620	mA	2
Power Consumption	Pc	-	1.75	-	W	2
Rush current	I _{RUSH}	-	-	1.5	А	4
Differential Impedance	Zm	90	100	110	Ω	3
Differential Input Voltage Rx	V_{IH}			+100	mV	$V_{CM} =$
	$V_{I\!L}$	-100			mV	+1.25V

Notes: (1) The power supply ripple is measured whereas a black pattern is displayed;

- (2) The specified current and power consumption are under the conditions at $V_{cc} = 3.3$ V, T = 25°C, and $f_v = 60$ Hz, whereas a vertical stripe pattern (the worst case) is displayed;
- (3) This impedance value is needed to a proper display and is measured form LVDS T_x to its mating connector;
- (4) The duration of the rush current is about 20 ms, which should have the following typical condition.

5.2.6 Signal Timing

5.2.5.1 Signal Impedance

Defined in VESA standard for LVDS FPDI 2

5.2.5.2 Timing Data

This is the signal timing required at the input of the control ASIC concerned with LVDS as a FlatLink or equivalent. All of the interface signal timing should be satisfied with the following specifications based on the VESA timing guideline (1440x900 @ 60 Hz) for it's proper operation. LP171W01 panels with LVDS transmitter are recommended to be connected with the Display Enable, Horizontal Sync, Vertical Sync, Clock Signal from the Video Signal Controller to the input of the Transmitter simultaneously.

at 25°C		-	-	1300	V _{RMS}	
at 0°C		-	-	1500	V _{RMS}	
Operating Frequency	\mathbf{f}_{BL}	40	60	70	kHz	
Power Consumption	\mathbf{P}_{BL}	-	4.3	-	W	3
Leakage Current	$I_{in} - I_{out}$			1.5	mA	4
Life Time		10,000	15,000		Hrs	5
				-		

Notes: (1) The variance of the voltage is $\pm 10\%$;

- (2) The transformer output voltage in the inverter must be higher due to the loss of the ballast capacitor in the inverter;
- (3) The lamp power consumption shown above does not include loss of external inverter;
- (4) The lamp leakage current is measured by the current difference between in and out, whereas the output current is set at 6.0 mA;
- (5) The lifetime is determined by the time at which brightness of lamp is 50% compare to that of the initial value at the typical lamp current.
- (6) Requirements for the system inverter design, which is intended to have a better display performance, a better power efficiency and a more reliable lamp. It shall help increase the lamp lifetime and reduce its leakage current.
 - a. The unbalance rate of the inverter waveform should be 10% below;
 - b. The distortion rate of the waveform should be within $\sqrt{2 \pm 10\%}$;
 - c. The ideal sine wave form shall be symmetric in positive and negative polarities.

* Unbalance rate:
| I_p - I_{-p} | / I_{rms} * 100%
* Distortion rate
I_p (or I_{-p}) / I_{rms}

6 OPTICAL REQUIREMENTS

6.1 Measuring Conditions

The optical characteristics are determined after the unit has been 'ON' and stable for approximately 30 minutes at the maximum brightness, in a dark environment at an ambient temperature at 25°C \pm 2°C. The measuring distance is about 50 cm from the LCD surface at normal unless otherwise specified. The electrical conditions include V_{cc} = 3.3 V, f_v = 59.94 Hz, f_{CLK} = 96.21 MHz, I_{BL} = 6.0 mA with 100% PWM duty cycle. The measurement spot at the center is approximately 12 mm in diameter from a distance of 400 mm by TOPCON BM-5A or 15 mm in diameter from a distance of 500 mm by PR 650. The CIE 1931 Standards will be used.

NOTICE OF PROPRIETARY PROPERTY

Apple Computer, Inc. Size: A METRIC Scale: NONE	Page 29 of 49
Title: Spec, Elec., Dspl., LG 17"W TFT-LCD, Q41/Q41a Project	DWG Number: 062-9499 Rev. A

6.2 Definition

6.2.1 Average Luminance

 $L_{Ave} = (L4 + L5 + L7 + L9 + L10) / 5,$

where the luminance at 5 spots is measured at the front of screen on axis and at a backlight current I_{BL} of 5 mA.

6.2.2 Luminance Uniformity

 $\delta L/L = L_{max}/L_{min}$

where, $L_{max} = max$ {Luminance values at 13 points},

 $L_{min} = min \{Luminance values at 13 points\}$

 L_{Ave} = Average Luminance as measured in Section 6.2.1.

6.2.3 Contrast Ratio

CR = Luminance at G_{max} / Luminance at G_{min}

$$CR_{Ave} = [CR(4) + CR(5) + CR(7) + CR(9) + CR(10)] / 5$$

6.2.4 Viewing Angle

The viewing angle is defined as the viewing angle range under the condition at $CR \geq 10{:}1$.

NOTICE OF PROPRIETARY PROPERTY

<u>Apple Computer, Inc.</u>	Size: A METRIC	Scale: NONE	Pag	ge 30 of 49
Title: Spec, Elec., Dspl.,	LG 17"W TFT-LCD,	Q41/Q41a Project	DWG Number: 062-9499	Rev. A

6.2.5 Response Time

The response time, $t_R + t_F$, is defined in the following figure and shall be measured by switching the input signal for "black" and "white".

6.2.6 Chromaticity & White Balance

The color coordinates and white balance should be measured at G_{max} brightness level in CIE 1931 Standards. The tolerance should be within 0.030.

6.2.7 Gray Scale Linearity or Gamma Value

The display luminance, L_G , is measured at the different gray scales, G_{min} , ..., G_{max} . The exponential fitting is used to determine the gamma (γ) value, which should be an intrinsic or uncorrected characteristic.

$$L_G \sim G^{\gamma}$$
.

6.2.8 Flicker

No visual flicker will be allowed. The flicker level should be measured with either vertical stripes or a checker pattern, defined in Sec. 5.3.6. The output signal of a photometer is sent to an FFT analyzer. The flicker is essentially a ratio of the powers in the frequency spectrum at 30 Hz (P_x) and 0 Hz (P_0), *i.e.*,

$$F = 10 \text{ Log } (P_x / P_0).$$

THE INFORMATION CONTAINED HEREIN IS THE PROPRIETARY PROPERTY OF APPLE COMPUTER, INC. THE POSSESSOR AGREES TO THE FOLLOWING: (i) TO MAINTAIN THIS DOCUMENT IN CONFIDENCE; (ii) NOT TO REPRODUCE OR COPY IT; (iii) NOT TO REVEAL OR PUBLISH IT IN WHOLE OR PART.

6.2.9 Cross-talk

No visual cross-talk will be allowed. Two luminance values are measured at center spot with 50 x 50 pixels. The cross-talk, D_{SHA} , is defined as,

$$D_{SHA} = (L_B - L_A)/L_B \cdot 100\%$$
,

Where, $L_A =$ Luminance in Pattern A

 L_B = Luminance in Pattern B.

Pattern A Gray Scale = 31 in center Black in surrounding area

Pattern B					

Pattern B Gray Scale = 31 full screen

7 ENVIRONMENTAL

The display modules shall meet all functional and cosmetic specifications after testing to the environmental quality standards listed in this section. Additionally, the LCD modules in Apple's products shall pass all the system testing requirements listed in the end of this document.

- 7.1 Shock and Vibration
 - 7.1.1 There will be no functional or cosmetic defects following a shock to all 6 sides delivering at least 200 G in a half sine pulse no longer than 2 ms to the display module, secured by its designated mounting details, in accordance with MIL-STD-202F Method 213B, test condition A.
 - 7.1.1.1 There will be no functional defects following a shock delivering at least 260 g in a half sine pulse no longer than 2 ms to each of 6 sides. Each of the 6 sides will be shock tested with one each display, for a total of 6 displays. The displays are secured by designated mounting details, in accordance with MIL-STD-202F Method 213B, test condition A.
 - 7.1.2 There will be no functional or cosmetic defects following a shock delivering at least 60 G in a pulse 11 msec or longer to the display module, secured by its designated mounting details, in accordance with MIL-STD-202F Method 213B, test condition A.
 - 7.1.3 There shall be no functional or cosmetic defects following a vibration test, conducted at 1.5 G from 5–150 Hz, 0.37 Oct/min with sine wave for 30 min./axis, with the display secured by its designated mounting details, and conducted in accordance with MIL-STD-202F, method 201A.

THE INFORMATION CONTAINED HEREIN IS THE PROPRIETARY PROPERTY OF APPLE COMPUTER, INC. THE POSSESSOR AGREES TO THE FOLLOWING: (i) TO MAINTAIN THIS DOCUMENT IN CONFIDENCE; (ii) NOT TO REPRODUCE OR COPY IT; (iii) NOT TO REVEAL OR PUBLISH IT IN WHOLE OR PART.

7.2 Temperature and Humidity

Unless otherwise stated in this specification, the display module must meet functional and cosmetic requirements after testing in accordance with Apple Spec. # 080-0859, non-operating and operating conditions.

For these tests, the following limits set forth in Specification #080-0859 shall be altered to read.

7.2.1 General Performance Requirements

Note:

- 1) Maximum wet bulb temp operating temperature is 39°C.
- 2) Maximum wet bulb temp storage temperature is 48°C.

7.2.2 Non-operational Testing

7.2.2.1 Low Temperature

-25°C @ 500 hrs

7.2.2.2 High Temperature

65°C @ 500 hrs

7.2.2.3 High Temperature and High Humidity

 60° C @ 500 hrs, R.H. = $75\% \pm 10\%$

7.2.2.4 Thermal Shock

Cycle display from -25°C to 65°C with 5-minute transfer time,

100 cycles at -25°C/65°C/-25°C.

7.2.3 Operational Testing

7.2.3.1 Low Temperature

0°C for 500 hours

7.2.3.2 High Temperature

50°C for 500 hours

7.2.3.3 High Temperature and High Humidity

50°C and 90% R.H. for 240 hours (Functional Check) Maximum wet-bulb temperature at 39°C or lower without condensation.

8.1.2 Static Load Deflection and Breakage

Supplier shall demonstrate compliance per Apple Specification 062-2208 Static Breakage Test

8.2 Electrostatic Discharge (ESD)

Display modules are to be tested for ESD susceptibility per Apple specification 062-0302. The display modules must meet the Level 1 for the bare module, and Level 1 through III test requirements stated in the above referenced specification, when assembled in a portable computer.

8.3 MTBF

Supplier to demonstrate display module meets minimum 50,000 Hrs.@90% Confidence Supplier to include any acceleration factors included in the calculations. Power cycling frequency during this test is to be approved by Apple.

8.4 Bulb Start Test

10000 cycles @ 0° C. (30 seconds on, 30 seconds off, the inspection shall be performed at room temperature.)

10 REGULATORY

10.1 Product Safety (Environmental, Ergonomics, Safety and Health)

Materials: The vendor is to provide Apple, upon request, specific chemical composition information or certifications necessary for the product to enter countries, markets, and/or for component(s) material identification, or for Apple to respond to customer requests for information. The information may be in the form of, but is not limited to, Material Safety Data Sheets, material specification sheets, health hazard information, certifications, or other forms of documentation.

10.2 Material Content

This product's components, parts, and packaging shall be manufactured or assembled based upon the following requirements.

10.2.1 Chlorinated solvents, CFCs (chlorofluorocarbons), HCFCs (hydrochlorofluorocarbons), and ODCs (Ozone-depleting substances) shall not be used in the manufacture or assembly of the flat panel display. This includes compounds listed in annex A, B, and C of the "Montreal Protocol on Substances that Deplete the Ozone Layer."

The vendor shall provide a written statement that the flat panel display, supplied to Apple, does not contain or will not be manufactured with any chlorinated solvents, CFCs, HCFCs, and Ozone-depleting Chemicals

10.2.2 For the production of the flat panel display, substances may not be used which are listed in German TRGS 905 or 900 or in the German MAK list.

The vendor shall provide a written statement that the flat panel display, supplied to Apple, does not contain any substances listed in the German TRGS 905 and 900 as being carcinogenic category 3, or in the German MAK lists under MAK III A1, A2, or MAK IIIB.

THE INFORMATION CONTAINED HEREIN IS THE PROPRIETARY PROPERTY OF APPLE COMPUTER, INC. THE POSSESSOR AGREES TO THE FOLLOWING: (i) TO MAINTAIN THIS DOCUMENT IN CONFIDENCE; (ii) NOT TO REPRODUCE OR COPY IT; (iii) NOT TO REVEAL OR PUBLISH IT IN WHOLE OR PART.

Title: Spec, Elec., Dspl., LG 17"W TFT-LCD, Q41/Q41a Project	DWG Number: 062-9499 Rev. A

10.2.3 Plastics used in the flat panel display shall not contain PVC (poly vinyl chloride), PBBs (polybrominated biphenyls), PBDE (polybrominated diphenyl ethers), chlorinated paraffins, cadmium (Cd) additives, lead (Pb) additives, or flame-retardants classified by any country as carcinogenic, mutagenic, or teratogenic.

The vendor shall provide a written statement that the flat panel display, supplied to Apple, does not contain PVC (poly vinyl chloride), PBBs (polybrominated biphenyls), PBDEs (polybrominated diphenyl ethers), chlorinated paraffins, cadmium (Cd) additives, lead (Pb) additives, or flame-retardants classified by any country as carcinogenic, mutagenic, or teratogenic.

10.2.4 No Cadmium (Cd) may be found in the display.

The vendor shall provide a written statement that the flat panel display, supplied to Apple, does not contain any cadmium (Cd).

10.2.5 No Mercury (Hg) may be found in the display, with the exception of mercury used in the backlight. The backlight must be modular in design so that it may be easily separated from the rest of the flat panel without the use of any special tools.

The vendor shall provide a written statement that the flat panel display, supplied to Apple, does not contain any mercury (Hg), except for the mercury in the flatpanel display backlight. Also, that the backlight is modular in design so that it can be easily separated from the rest of the flat panel without the use of any special tools.

10.3Recyclability

10.3.1 Flat panel display must be modular in design so that parts can be easily separated, without any special tools, for ease of proper recycling/disposal at the product's end-of-life.

NOTICE OF PROPRIETARY PROPERTY

Apple Computer, Inc. Size: A METRIC Scale: NONE	Page 43 of 4
Title: Spec, Elec., Dspl., LG 17"W TFT-LCD, Q41/Q41a Project	DWG Number: 062-9499 Rev. A

The vendor shall provide a written statement that the flat panel display, supplied to Apple is modular in design so that parts can be easily separated without any special tools, for ease of proper recycling/disposal at the product's end-of-life.

10.3.2 Flat panel display plastic parts >25 grams must be marked according to ISO 11469 (except for the LGP (light guide panel) and optical films in the backlight).

The vendor shall provide a written statement that the flat panel display, supplied to Apple, has all plastic parts >25 grams, marked according to ISO 11469 (except for the LGP (light guide panel) and optical films in the backlight.

10.4 Product Safety Certification For Flat Panel Display Assembly

- 10.4.1 Safety Agency Submittals:
- 10.4.2 The vendor shall submit their flat panel display to a Nationally Recognized Test Laboratory (NRTL, i.e. UL or CSA) at the earliest possible design stage for test and evaluation in accordance with United States standard UL 60950 (latest edition) and Canadian Standard CSA C22.2 No. 60950 (latest edition).
- 10.4.3 The US/Canadian Nationally Recognized Test Laboratory shall test the flat panel display sub-assembly and issue a US and Canadian safety report. The report shall clearly reference the model number for the flat panel display.
- 10.4.4 A copy of the US/Canadian Nationally Recognized Test Laboratory safety report shall be provided to Apple Product Safety at the earliest possible date prior to production. Delivery of these documents is expected at least one month before product ramp.
- 10.4.5 The vendor shall be responsible for resubmitting the flat panel display to the US/Canadian Nationally Recognized Test Laboratory if safety critical changes are made to the flat panel display materials or construction. All US/Canadian safety report revisions shall be delivered to the Apple Project coordinator and Apple Product Safety.

THE INFORMATION CONTAINED HEREIN IS THE PROPRIETARY PROPERTY OF APPLE COMPUTER, INC. THE POSSESSOR AGREES TO THE FOLLOWING: (i) TO MAINTAIN THIS DOCUMENT IN CONFIDENCE; (ii) NOT TO REPRODUCE OR COPY IT; (iii) NOT TO REVEAL OR PUBLISH IT IN WHOLE OR PART.

Title: Spec, Elec., Dspl., I	LG 17"W	TFT-LCD, O	Q41/Q41a Projec	t DWG Number: 062-9499	Rev. A

- 10.4.6 The flat panel display shall be marked with an agency label with the following content:
 - 10.4.6.1 Display Model number
 - 10.4.6.2 Manufacturer's name or agency file number
 - 10.4.6.3 UL or CSA US/Canadian Combination Mark

10.5 Materials Construction for Flat Panel Display Assembly

- 10.5.2 General: The flat panel display sub-assembly will be evaluated in the end product against the requirements of IEC 60950 (Safety of Information Technology Equipment) and all country deviations listed in the latest IECEE CB Bulletin. This sub-assembly is required to comply with the appropriate and applicable sub-clauses of this safety standard, and not impede the end product's compliance to this standard.
- 10.5.3 Plastic materials, films, structural plastics and foams: All flammable materials shall be UL Recognized or CSA certified component materials that comply with UL 94 "Tests for Flammability of Plastic Materials for Parts in Devices and Appliances" with a minimum flame rating at the specified wall thickness of V-2 or better; HF-2 or better.
- 10.5.4 Printed Circuit Boards: All printed circuit board shall be UL Recognized or CSA certified component materials that comply with UL 94 "Tests for Flammability of Plastic Materials for Parts in Devices and Appliances" with a minimum flame rating of V-1.
- 10.5.5 Connectors: All connectors shall be UL Recognized or CSA certified component materials that comply with UL 94 "Tests for Flammability of Plastic Materials for Parts in Devices and Appliances" with a minimum flame rating of V-2.
- 10.5.6 Low Voltage Wiring: All wiring shall be UL Recognized or CSA certified component Appliance Wiring Material (AWM) that complies with UL 758

THE INFORMATION CONTAINED HEREIN IS THE PROPRIETARY PROPERTY OF APPLE COMPUTER, INC. THE POSSESSOR AGREES TO THE FOLLOWING: (i) TO MAINTAIN THIS DOCUMENT IN CONFIDENCE; (ii) NOT TO REPRODUCE OR COPY IT; (iii) NOT TO REVEAL OR PUBLISH IT IN WHOLE OR PART.

"Standard for Appliance Wiring Material" with a with a flame rating of VW-1. Wiring shall be protected from cutting, abrasion and crushing.

- 10.5.7 High Voltage Wiring: All high voltage wiring to the display lamps shall be UL Recognized or CSA certified component Appliance Wiring Material (AWM) that complies with UL 758 "Standard for Appliance Wiring Material" with a minimum voltage rating of 1.5 kV and a flame rating of VW-1. Wiring shall be protected from cutting, abrasion and crushing.
- 10.5.8 Rated Operating Temperature: Unless otherwise specified, the flat panel display sub-assembly and all components shall be rated for a 50°C ambient temperature.
- 10.5.9 Copies of applicable Material Safety Data Sheet (MSDS) per US OSHA requirements or other specific chemical information necessary to enter countries, markets, or for component material identification shall be supplied to Apple by the supplier before DVT.

10.6 Ergonomics

10.6.1 The flat panel display must comply with the ergonomic requirements of ISO 13406 parts 1 and 2.

The vendor shall provide a written statement that the flat panel display, supplied to Apple, is certified to comply with ISO 13406, parts 1 and 2.

10.7 Electromagnetic Compatibility (EMC)

10.7.1 Emissions

The final product must meet Apple Class B Emission Standards for home electronic device when configured within a system per Apple Spec. #062-0088. The display supplier must provide all necessary support as required to meet this requirement. EMI measurements are taken at the worst-case contrast setting.

10.7.2 Susceptibility

THE INFORMATION CONTAINED HEREIN IS THE PROPRIETARY PROPERTY OF APPLE COMPUTER, INC. THE POSSESSOR AGREES TO THE FOLLOWING: (i) TO MAINTAIN THIS DOCUMENT IN CONFIDENCE; (ii) NOT TO REPRODUCE OR COPY IT; (iii) NOT TO REVEAL OR PUBLISH IT IN WHOLE OR PART.

Performance degradation due to external noise or RF will be considered as specified in #062-0088 for Class B products.

- 10.7.3 Spectrum Spreading Compatibility (SSC)
 - 10.7.3.1 Emissions

The final product must be compatible with spectrum spreading conditions specified in 10.7.4 of this document. No failure or degradation in electronic functionality and optical performance is allowed with the spreading turned ON compared to that when it is turned OFF.

10.7.3.2 Conditions for Spectrum Spreading

Spreading %: 0 (min), 1.5 (typical), 2.0 (max)

Spreading type: down

Modulation Rate: 40 to 80 kHz.
