Domestic HUB2.0 controller chip HS8845

Domestic HUB controller chips, due to the dual needs of localization requirements and cost control, are currently more and more widely used, and the previous small series has been briefly listed. Today is a small package, low-cost HS8845, its brand is HUASHNX, may be currently used, or have heard of not much, but mentioned their other HS8836A, most people should have heard, the current application is more and more extensive.

    Here is a brief description of HS8845.

1、1, in line with USB2.0 specifications: one to four, the upstream port supports high-speed (HS) and full-speed (FS) channels, downstream ports support HS, , FS and low-speed (LS) channels.

2、8-bit microprocessor: Includes RISC-like architecture, USB optimized instruction set.

3, TSSOP16 package: smaller than other models of packaging, reduce the use of PCBA.。

4、Typical applications: independent USB hub, PC motherboard USB hub (connection notebook), LCD HUB, HUBany other composite device that supports USB hub.

The schematic is as follows:

Shenzhen Sonnic Technology Co., Ltd., supply , HS8845, HS8836A and other chips, for more information and sampling, , please contact Mr. Hua 生 QQ : 695606378 mobile phone: 15347785906, original spot, welcome to exchange.
