Wire connections are just two THT pads used to lay wire connections across a board. This may be a clumsy method, but also a quick and dirty method to get rid of routing and EMI problems. They correspond with the WIRE\_CONNECTION\_L\_REVE\_DATE15JUN2010, WIRE\_CONNECTION\_JL\_REVE\_DATE15JUN2010 and WIRE\_CONNECTION\_JIL\_REVE\_DATE15JUN2010 symbols from SymbolsSimilarEN60617+oldDIN617-RevXX.lib library.

1:1 Print! Check dimension by controlling the gauge!

KiCAD Footprints of some wire connections / bridges / wire jumpers from the file
